

3D Cactus

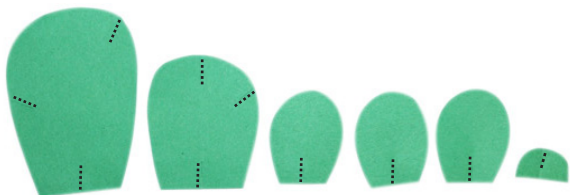

Materials

- Riverside® Construction Paper
- Black Marker
- Glue

Steps:

1. Cut out the shapes you'll need:
 - 6 different sized cactus parts
 - rectangle for flower

2. Cut ½" slits in the cactus pieces to insert the other cactus parts.

3. Accordion fold the pink rectangle back and forth to create a flower. Fold it in half the long way to create a fan shape, and secure with glue.

4. Using a Black marker, draw on some short lines for thorns. Slide the additional cactus pieces into the pre-cut slits, and attach the flower with glue. Display your finished piece on a decorative plate or small pot.
